Application No. 10/714,894 Amendment dated October 16, 2006 Reply to Office Action of June 16, 2006

IN THE ABSTRACT:

Please replace the Abstract of the Disclosure with the following amended Abstract:

A product provided with a coding pattern which comprises a plurality of marks, each of which represents one of at least two different values, and which further comprises a plurality of nominal positions, each of said plurality of marks being associated with a nominal position and the value of each mark being determined by its location relative to its nominal position. The invention also comprises use of the product. A method and device of using the product are also disclosed.
